Objective

I am a young, determined individual who is eager to learn new skills and develop my existing skill-set. I have gained valuable transferable skills throughout previous employment and work experience placements which I am enthusiastic to implement into employment. I have matured my organisation and time management skills which have assisted the efficiency of tasks being completed. I have a keen eye for attention to detail and I have excellent problem solving skills. I am honest, punctual and reliable and would love the opportunity to prove such qualities. My long term objective is to get eventually start working in the Information Security field, but I would also like to work as a web developer or system administrator.

Skills

I have strong experience operating, maintaining, and administrating Linux, Windows, and MacOS systems. I am also adept at configuring web and database servers on both Linux and Windows systems. I have good knowledge of bash, so remote administration through ssh is no problem for me.

Languages

Programming— C, Go
Scripting— Python2/3, Bash, Javascript, PHP
